Featuring

KATIE BELEZNAY, MD, FAAD

Dr. Katie Belezny is a board-certified dermatologist in both Canada and the United States. She completed her medical training and dermatology residency at the University of British Columbia and is a Clinical Instructor with the UBC Department of Dermatology. Dr. Belezny is fellowship-trained in laser and cosmetic dermatology and is active in research and clinical trials in aesthetic dermatology. Dr. Belezny has published more than 30 peer-reviewed articles and textbook chapters, and serves as a contributing editor for the journal Dermatologic Surgery. She has been recognized for her research in the area of injectable complications and is a frequent speaker at international conferences. Dr. Belezny was also selected to participate in the prestigious ASDS Future Leaders Network. She currently practices at Carruthers & Humphrey Cosmetic Dermatology and Seymour Dermatology in Vancouver BC.

Featuring

JOELY KAUFMAN, MD, FAAD

Dr. Joely Kaufman is a board-certified Dermatologist & Director of Skin Associates of South Florida and the Skin Research Institute. She graduated from the University of Miami - Miller School of Medicine, where she also trained as a dermatologist at the prestigious Department of Dermatology and Cutaneous Surgery and is currently a Voluntary Associate Professor. Dr. Kaufman has been involved as a principle investigator in multiple pivotal trials for new drugs and devices in aesthetics, including neuromodulators, fillers and devices. She is on the board of the Florida Society for Dermatology & Dermatologic Surgery and a past president of the Miami Society of Dermatology.

Featuring

JOSÉ MONTES, MD

Dr. José Raúl Montes obtained his Medical Degree and completed his Residency/Internship in Ophthalmology at the University of Puerto Rico, School of Medicine. He then completed his Fellowship in Oculoplastic Surgery at the University of Cincinnati. Dr. Montes is certified by the American Board of Ophthalmology and a Fellow of the American Academy of Cosmetic Surgery, American Academy of Ophthalmology, American College of Surgeons, and American Society of Ophthalmic Plastic & Reconstructive Surgery. Dr. Montes is a Professor at the University of Puerto Rico School of Medicine and has been mentoring students at the Río Piedras Medical Center. With over 25 years of experience and as a member of various Advisory Boards for several pharmaceutical companies, he has overseen the process of introducing new products for FDA approval into the United States.

RESTYLANE FAMILY IMPORTANT SAFETY INFORMATION

The Restylane family of products are indicated for patients over the age of 21, and includes *Restylane*®, *Restylane-L*®, *Restylane*® Lyft with Lidocaine, *Restylane*® Silk, *Restylane*® Refyne, *Restylane*® Defyne and *Restylane*® Kysse.

APPROVED USES

Restylane® and *Restylane-L*® are for mid-to-deep injection into the facial tissue for the correction of moderate to severe facial wrinkles and folds, such as nasolabial folds. *Restylane*® and *Restylane-L*® are also indicated for injection into the lips.

Restylane® Lyft with Lidocaine is for deep implantation into the facial tissue for the correction of moderate to severe facial wrinkles and folds, such as nasolabial folds and for cheek augmentation and for the correction of age-related midface contour deficiencies. *Restylane*® Lyft with Lidocaine is also indicated for injection into the dorsal hand to correct volume loss.

Restylane® Silk is for lip augmentation and for correction of perioral wrinkles.

Restylane® Kysse is for lip augmentation and for correction of upper perioral wrinkles.

Restylane® Refyne is for mid-to-deep injection into the facial tissue for the correction of moderate to severe facial wrinkles and folds, such as nasolabial folds.

Restylane® Defyne is for mid-to-deep injection into the facial tissue for the correction of moderate to severe deep facial wrinkles and folds, such as nasolabial folds.

Do not use if you have severe allergies with a history of severe reactions (anaphylaxis), are allergic to lidocaine or gram-positive bacterial proteins used to make hyaluronic acid, prone to bleeding, or have a bleeding disorder. The safety of use while pregnant or breastfeeding has not been studied. Tell your doctor if you have a history of scarring or pigmentation disorders as these side effects can occur with hyaluronic acid fillers. Tell your doctor if you are planning other cosmetic treatments (i.e., lasers and chemical peels) as there is a possible risk of inflammation at the injection site.

Tell your doctor if you're taking medications that lower your body's immune response or affect bleeding, such as aspirin or warfarin, as these medications may increase the risk of bruising or bleeding at the gel injection site. Using these products on gel injection sites with skin sores, pimples, rashes, hives, cysts, or infections should be postponed until healing is complete.

The most common side effects are swelling, redness, pain, bruising, headache, tenderness, lump formation, itching at the injection site, and impaired hand function. Serious but rare side effects include delayed onset infections, recurrence of herpetic eruptions, and superficial necrosis at the injection site. The risk of unintentional injection into a blood vessel is small but can occur and could result in serious complications, which may be permanent including, vision abnormalities, blindness, stroke, temporary scabs, or permanent scarring of the skin. As with all skin injection procedures, there is a risk of infection.

To report a side effect with any *Restylane* product, please call Galderma Laboratories, L.P at 1-855-425-8722.

To learn more about serious but rare side effects and full Important Safety Information, visit www.RestylaneUSA.com.
